

Breaker Rebuild

Full shop remanufacture of circuit breakers — torn down, reconditioned to OEM spec, tested, and documented.

WHAT WE REBUILD

- Air circuit breakers
- Vacuum circuit breakers
- Oil & SF6 breakers
- Low-, medium-, and high-voltage classes
- All major OEMs
- Mechanisms & operators

WHAT WE DO

- Teardown & inspection
- Contact & arc-chute reconditioning
- Mechanism overhaul (spring, latch, operator)
- Re-plating & paint
- Obsolete-part fabrication in-house
- Solid-state trip upgrades & retrofits
- Vacuum interrupter testing & replacement

TESTING & WARRANTY

- Contact resistance (ductor)
- Insulation resistance / HiPot
- Timing & travel analysis
- Primary injection
- Vacuum interrupter integrity
- Full before/after test report
- One-year parts-and-labor warranty

We make it. We service it. We rebuild it. One source — machine the parts, rebuild the breaker, install it in your substation.
